

## PRODUCT NOTICE

#431

### Change in NAPA Fuel Filter #3546 – Increased Height NAPA Gold Fuel Filter 3546

#### SCOPE:

Due to a recent change in supplier, the NAPA Fuel Filter 3546 has undergone a dimensional modification. The filter was manufactured with an overall height that is approximately 1.75” taller.

#### IMPACT:

This increase in height may result in compatibility issues with certain applications. While these applications may have previously accepted filters cross-referenced to NAPA Fuel Filter 3546, they may no longer accommodate the taller design. It is critical to verify clearance before installation.

#### PRODUCT IMPROVEMENT:

Shorter filter height is in production for distribution.

#### ACTION REQUIRED:

- Check available clearance before using the NAPA Fuel Filter 3546.
- Do not use this filter in applications with restricted vertical space.
- Monitor for future updates regarding replacement availability.

\* For this specific part number, package may show “Fuel / Water Separator” or “ Fuel Filter” interchangeably.
