

LIGHT DUTY OIL FILTERS

Filter Life*	5,000 Miles	10,000 Miles	25,000 Miles
Efficiency	95% @ 30 micron	98% @ 20 micron	99% @ 20 micron
Pressure Relief Valve	Prevents oil starvation in the case of a blockage of the filter media		
Media Type	Cellulose	Synthetic Blend Reinforced media offers improved particle capture	Wire-Backed Full Synthetic Media Uniform fibers offer higher efficiency at smaller micron levels, while the wire backing maintains media shape and performance under high flow and pressure
ADBV Type (for Spin-on)	Nitrile	Silicone High retention power	Silicone High retention power
Base Plate	Heavy duty baseplate with precision forged threads		
Gasket / O-Ring	Nitrile	Silicone Unaffected by extreme temps	HNBR (Hydrogenated Nitrile Butadiene Rubber) Long-term durability for extended drain intervals

* Follow recommended change intervals as outlined in your owner's manual.
